### How To Make A Cupcake

1. First, put All-purpose flour into a bowl.
2. Then, add granulated sugar, baking powder, a pinch of salt and mix well.
3. Next, preheat the water to 32-43°C. Pour the water into the oil.
4. Then, add the vanilla extract and mix well. Pour the mixture little by little and mix until there are no lumps.
5. After that, transfer it into a piping bag.
6. Next, line a pan with the cupcake liner. Fill it until it is half way full. Bake the cupcakes in a 180°C preheated oven for 18-20 minutes, until the toothpick comes out clean.
7. After that, let the cupcakes cool in the pan for 10 minutes.
8. Finally, transfer to the wire rack to cool completely
